MONOCLE

Looking Glass Collection

A single dark lens found on a city sidewalk inspired our Monocle Collection. Eyeglass lenses, and similarly Side-view mirrors usually come in pairs with a Left and a Right. Shapes that are organic yet engineered for a specific purpose: looking through, seeing behind, focusing in and reflecting. On their own and removed from context we see them in a different light.

A band of solid brass or stainless steel, suspended from two pegs on a wall partially frames the lens-like form in a sling to provide curiously flattering self reflection.

"The real voyage of discovery consists not in seeking new lands but in seeing with new eyes." - Marcel Proust

DIMENSIONS

Four poly-ovoid shapes and sizes comprise the collection:

- Vertical Portrait - 23.5" wide x 44" tall
- Landscape Lateral - 30" wide x 32" tall
- Elongated Full-length - 24" wide x 72" tall
- Compact Personal - 22.5" wide x 28" tall

All frames are 1.75" deep. A French Cleat on the back in concert with the two pegs securely mount the mirror to the wall.
