Geppetto | 1-50

Limited

A single, sculptural casting made using solid red bronze, intended for use as a stool or side table.

Honouring central-eastern Canada's manufacturing heritage, Geppetto was cast in sand- the same process used to produce machine parts for heavy industry. The sand-casting process produces faintly perceptible irregularities that enhance Geppetto's tactile appeal.

The base has a peened finish; the top is available in a mirror polished finish.

Dimensions

- 12" Dia. x 19" H
