ONJIRI SIDE TABLE

Product: Onjiri Side Table

Materials: Solid Hand Cast Glass

Color/Texture: These tables are made with a standard clear soda lime glass. Each batch of glass is hand mixed and melted and therefore may have a slight color variance. There is typically a light golden to very subtle green tone to the glass due to its significant mass. The inherent "chill texture" results from the glass chilling slightly when poured into the steel mold.

Description: The glass components are hand-cast in California. The glass top and the glass base are then cold-fused together using an optically clear and UV-stable adhesive designed specifically for glass-to-glass bonding

Options: also available in custom colors and sizes, Custom colors and sizes are subject to upcharge and significantly longer lead times.

Dimensions: **Onjiri Side Table 22 inch:** 18-inch height, 22-inch diameter glass top, 12-inch diameter glass base.

Onjiri Side Table 25 inch: 19 inch height, 25 inch diameter glass top, 12 inch diameter glass base.
