

CHRISTISON LEWIS INC.

## SOLAPE COFFEE TABLE

**Product:** SOLAPE COFFEE TABLE

**Designer:** Christison Lewis Inc.

**Materials:** Solid Hand-Cast Glass Top Two Solid Hand Cast, Cut, and Milled Table Bases

**Color/Texture:** each component of the Solape Coffee Table is hand-cast with a standard clear soda lime glass. Each batch of glass is hand-mixed and melted and therefore may have a slight color variance. There is typically a light golden to very subtle green tone to the glass due to the slight iron content of the raw materials used and its significant mass. The inherent "chill texture" results from the glass chilling slightly when poured into the graphite mold.

**Description:** All glass components are hand-cast in California. The glass top and the glass bases are separate pieces. The glass bases consist of two large blocks of glass that have been hand-cut, milled, and joined together in overlapping joint. This type of joint is normally found in woodworking and is referred to as a "cross lap joint".

**Options:** Also available in custom glass colors and sizes, Custom colors and sizes are subject to upcharge and significantly longer lead times.

**Dimensions:** **Glass Tabletop:** Length=74 inches Width=40 inches Thickness= 2 inches

**Glass Bases:** Length= 32 inches Width=16 inches Thickness= 4 inches
